Summary: Success in every course, regardless of doctrine, requires that law students acquire and become expert at applying a set of skills that can and should be taught explicitly throughout the course. This book highlights ways in which various academic skills (such as case briefing, close case reading, note taking, outlining, and exam preparation), legal reasoning skills (such as fact identification and analysis, issue spotting, and working with rules), and theoretical perspectives (such as socioeconomics, legal realism, and critical legal theory) can be incorporated directly into the syllabi of first-year courses.
