SHAREPOINT 2007 AND 2010 CUSTOMIZATION FOR THE SITE OWNER

Microsmith, Inc. Paperback. Book Condition: New. Paperback. 402 pages. Dimensions: 9.3in. x 7.5in. x 0.9in. Finally a book for the Site Owner! There are many books for administrators, developers, designers and end users, but few for the site owner. This one is for you, the SharePoint site owner and the SharePoint power user. Its also for the developer who does not want to reinvent the wheel and create a complex solution when a simpler one is available. Its for the SharePoint administrator who is always asked to do the impossible! This is not a branding book, but everything here can be used as part of your site design. Customization you can do! This book is designed to get you started in customizing your SharePoint site with the tools you have readily at hand. This book has complete copy and paste solutions, and it also shows how each solution was crafted and how it works. After working through a few of the customizations and picking up some basic skills, you can start to figure out how SharePoint has been put together and start creating your own customizations. Everything in this book can be done by a Site Owner or a Site Collection Administrator. Nothing in this book requires the deployment of files to the SharePoint web servers. Nothing in this book requires programming skills or Visual Studio (but additional skills and tools are always good). All of the examples can be duplicated using only web parts, SharePoint Designer, and copy and paste from the books web site. This is not a branding book, its all about improving the SharePoint user experience. While you can duplicate all of the examples using the step by step instructions, the book also explains how and why each one works. The book also includes getting started chapters...
