# SIMULTANEOUS TRIANGULARIZATION

Book Condition: New. Publisher/Verlag: Springer, Berlin | A collection of matrices is said to be triangularizable if there is an invertible matrix  $S$  such that  $S^{-1}AS$  is upper triangular for every  $A$  in the collection. This generalization of commutativity is the subject of many classical theorems due to Engel, Kolchin, Kaplansky, McCoy and others. The concept has been extended to collections of bounded linear operators on Banach spaces: such a collection is defined to be triangularizable if there is...
