Martino Fine Books, United States, 2011. Paperback. Book Condition: New. 224 x 150 mm. Language: English . Brand New Book. 2011 Reprint of the 1933 edition. Following the stock market crash of 1929 and the ensuing Great Depression, Fisher developed a theory of economic crises called debt-deflation, which rejected general equilibrium theory and attributed crises to the bursting of a credit bubble. According to the debt deflation theory, a sequence of effects of the debt bubble bursting occurs: 1. Debt liquidation and distress selling. 2. Contraction of the money supply as bank loans are paid off. 3. A fall in the level of asset prices. 4. A still greater fall in the net worth of businesses, precipitating bankruptcies. 5. A fall in profits. 6. A reduction in output, in trade and in employment. 7. Pessimism and loss of confidence. 8. Hoarding of money. 9. A fall in nominal interest rates and a rise in deflation adjusted interest rates. This theory was ignored in favor of Keynesian economics, partly due to the damage to Fisher s reputation from his overly optimistic attitude prior to the crash, but has experienced a revival of mainstream interest since the 1980s, particularly since the Late-2000s recession, and is now a main theory with which he is popularly associated.
