BONES TO ASHES

Cornerstone, United Kingdom, 2007. CD-Audio. Book Condition: New. Abridged edition. 142 x 125 mm. Language: English . Brand New. Under the microscope, the outer bone surface is a moonscape of craters. Preliminary diagnosis? Deformity of the bone. Maybe. Cortical destruction on a metacarpal. Maybe. Localised infection? Systemic disease process? Postmortem destruction, either purposeful or natural? A combination of the above? I don't have a diagnosis. The skeleton is that of a young girl, no more than fourteen years old - and forensic anthropologist Dr Temperance Brennan is struggling to keep her emotions in check. Coroner Jean Bradette is being evasive, insisting the bones are ancient and of no interest. But it doesn't quite add up, and a frustrated Tempe is convinced that Bradette is hiding something. It's not Tempe's case; she's overwhelmed with more urgent work in the lab. But the nagging in her subconscious won't let up. A memory triggered, deep in her hindbrain - the disappearance of a childhood friend; no warning, no explanation. Detective Andrew Ryan is working a series of parallel cases, and requires Tempe's forensic expertise. Three missing persons, three unidentified bodies - all female, all early- to mid-teens. Could there be a serial killer at work? Was Bradette's skeleton another in this tragic line of young victims? Or is Tempe over-reacting, making connections where none exist? Can she and Ryan put their personal tensions aside, and stop the killer before another young girl falls prey? Working on instinct, Tempe takes matters into her own hands. But she couldn't have predicted where this case would lead, or the horrors it would eventually uncover. Can Tempe maintain a professional distance as the past catches up with her in this, her most deeply personal case yet?.
